

Bordoflow®

New: pest management in accordance with environmental and consumer

Thanks to the innovative formulation micronized copper, Bordoflow New Sleeve combines control of pathogens and debris limited

Bordoflow® New Sleeve: the innovative packaging Politainer

With **Bordoflow®** New Channel stands in the forefront of pest management and the reduction of waste: it is a product for its intrinsic characteristics are allowed in organic farming.

New **Bordoflow®** is the innovative *Bordeaux mixture*, at low doses of copper, which with its 124 grams of copper per liter active, sided in protecting crops from attack by **fungi** and **bacteria** that compromise the crops of the farmers.

The innovative formulation of *micronized copper* enables you to use

Bordoflow® New only **250ml.** per *hectoliter* of water with a distribution of only 600g of copper **Cu + +** per acre to treatment.

These limited intake of copper have allowed **New Bordoflow®** to get a label with a few days of deficiency on crops and ready for direct consumption;

- **3 days** of shortage of strawberry, potato, tomato, eggplant, vegetable, bulb, root and cucurbits,
- **7 days** a leafy vegetables and fresh herbs.

All this in order to facilitate the farmer in the further preparation of mixtures and encourage the use of pesticides liquid, always the safest, in order to safeguard the health of the farmer and the environment.
